

Introduction

To support the implementation of new waste treatment and disposal services, LLW Repository Ltd has been developing its current Container Fleet to include a new re-usable ISO container and a packaging system to support the transport of waste for treatment. We aim to develop a suite of new packaging options that will support Customers in their waste management activities and to make waste segregation easier.

We have already had some input from Customers in the initial design of the container and as we are now nearing completion of the design phase, we would like to invite representatives from your organisation to come and discuss the design and operation of the new re-usable ISO container and the overall packaging system.

Container Workshop Invitation

To obtain your input into the design and use of the packaging system, LLW Repository Ltd intends to hold a Container Workshop on the 15th April 2010 at the:

Rhedged Centre (Ullswater Room) - Penrith

The Workshop is expected to run from 10:00 to 16.00, with lunch provided.

We would like to confirm numbers for this workshop. Could you please therefore respond to this Customer Notice, by sending an e-mail to: transportandlogistics@llwrsite.com, indicating if you wish to attend and the names of the attendees from your organisation.

A more detailed agenda and joining instructions will be issued to attendees upon confirmation of numbers. Responses are required by Wednesday 31st March 2010.

Further Information and Questions

If you would like any more information or have any questions regarding the workshop or the re-usable ISO container, then please either send an e-mail to: transportandlogistics@llwrsite.com or call Gillian McKeown on 01946 722008.
