

Capenhurst Site

Site Strategic Development

Martin Wells
Head of Strategy

Current Site Lifetime Plan

- Over 100 years to 2120
- Around £1.2BN lifetime cost
- Diffusion Plant
Decommissioning
- Management of redundant land
and assets
- Uranic materials management

- New Site Vision

Capenhurst Site Potential

- Valuable nuclear licensed site
- Significant asset base
- Accelerated hazard reduction
- Adding value to the NDA estate
- Innovative solutions for NDA community
- Proactive relationship with key stakeholders

Strategic Development Objectives

- Establish the basis for future strategy and introduce changes to the current LTP
- Minimise the hazard associated with long term storage of UF6
- Maximise revenue generation associated with NDA assets
- Explore options for the optimum commercial development of land and non-uranic assets at Capenhurst
- Work in line with development of NDA national strategies for uranics and low level waste materials
- Discuss with stakeholders their expectations with regard to the long term future of the Capenhurst site
