

Introduction

This form is to be completed by all users of the TC02 container. Consignors are responsible for completing the form prior to transporting both empty or full IP-96/GB/TC02 containers, the form is valid for one shipment only. This form must be prepared to notify receiving sites of the container assembly and the weight of the container before any lifting operations commence at receiving sites.

Please complete sections A, B, C & D of the table below, indicate a specific shipment reference or date, indicate quantity and variant of stillages used and, indicate quantity and variant of empty waste boxes loaded **or** quantity and variant and gross weight of any full waste boxes loaded (including the weight of the waste boxes as listed in section C **or** weight of items being loaded into the TC02 container . Then calculate and declare the actual gross weight of the container (including the tare weight of the actual container) in the highlighted box at the bottom of this form.

This form must be attached to the Transport Documentation provided to the Carrier, or if International shipment please place this form into the TC02 document holder (Note – The Document Holder is located on the end wall of the container).

If you need any assistance or have any questions regarding the completion of this form, please contact the LLW Repository Transport and Logistics Team, by e-mail: transportandlogistics@llwrsite.com or by telephone: (01946) 722004
